

Beslist API Submission

Adjust your Beslist product data update via API. Just follow steps below.

1. Step Create New Profile

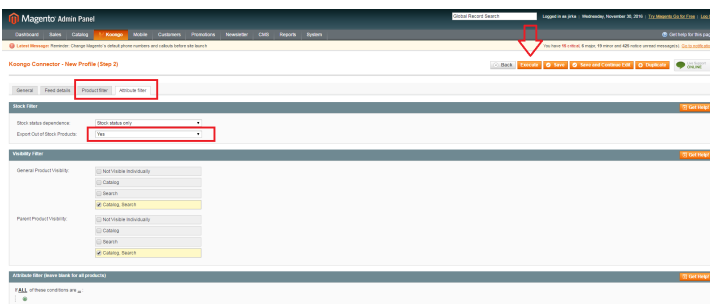

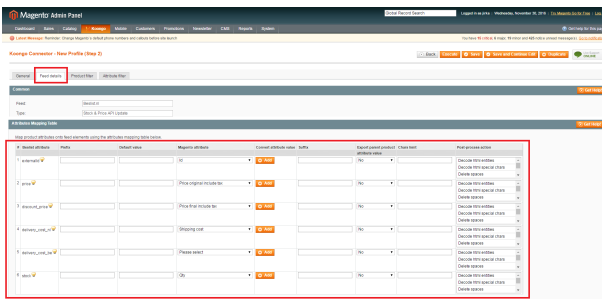

2. Select Feed Beslist.nl and type Stock & Price API update

3. Adjust attribute mapping and select products which should be updated

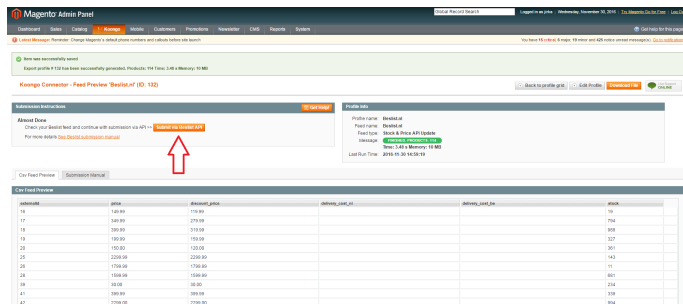

- Attribute mapping is usually adjusted with recommended settings by default.
- It is recommended to add also **Out of Stock products** into the Stock & Price API update feed.
- Finally click button Execute to generate feed.

4. Preview feed and continue to submission

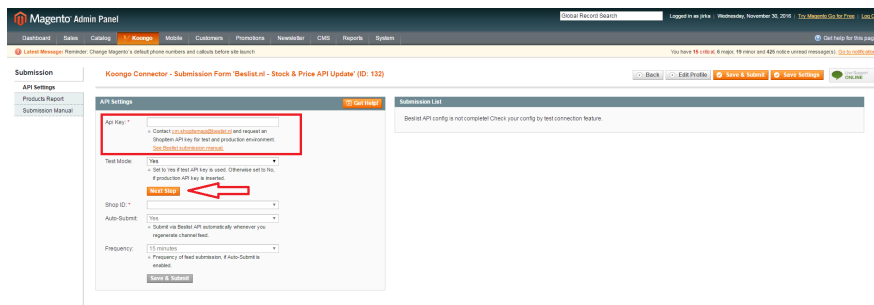

- Your Beslist data feed is ready.

- You can check content and possibly go back to profile settings if something is wrong. (Button Edit Profile)
- Click button **Submit via Beslist API** for next step.

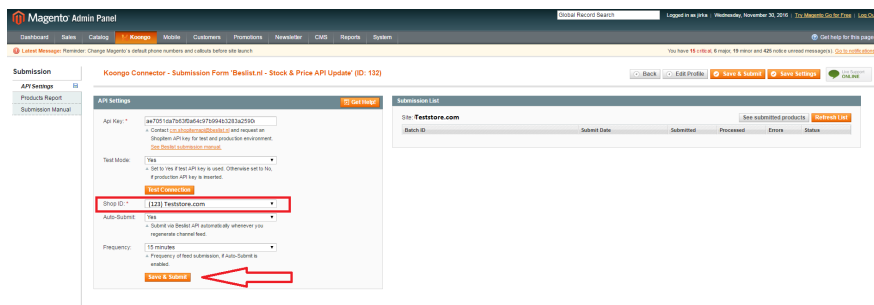

5. Insert API key

- Insert API key and click button Next Step
 - Test Mode will be filled automatically.
- If the API key is valid, than list of available stores will appear at Shop ID field.

6. Select your Beslist Store

- Select your Beslist Store in Store ID field and click Save & Submit button.
- Your product feed will be submitted directly.
- Default feed submission frequency is 15 minutes if Auto-Submit is enabled.
 - It means that your product prices, stock and other shipping costs will be updated every 15 minutes at your Beslist store.

7. Check submission report

- See feed processing result at Submission List section.
- You can also check submission processing result of particular products under tab Products Report (or click button See submitted products)
