

# Amazon Integration over API - setup

Once you have signed up for **Amazon Merchant Account** you need to associate your **Amazon account with Koongo**:

## Authorizing a developer

A seller must authorize a developer to make calls to Amazon MWS on the seller's behalf.

1. Go to the [User Permissions](#) page in Seller Central and log into your Amazon seller account as the primary user. Click **Visit Manage Your Apps** button

The screenshot shows the Amazon Seller Central interface. At the top, there's a navigation bar with the Amazon Seller Central logo, location (Koongo - Europe), website (www.amazon.co.uk), language (English), and a search bar. Below the navigation bar are various menu items: Catalogue, Inventory, Pricing, Orders, Advertising, Stores, Reports, Performance, and B2B. The main heading is "User Permissions" with a sub-heading "Use the Permissions Manager to grant access rights to other users. [Learn more](#)". A warning message states: "Amazon takes the security of your account seriously. Please invite only the people or businesses you trust to access your business information." Below this is a table for "Current Users" with columns for Name and Email Address. One user is listed: Jiri Zahradka with email info@koongo.com. To the right of this row is a "Manage Permissions" button. Below the table is a section for "Add a New Seller Central User" with input fields for Name, Email Address, and Language (set to English), and an "Invite" button. On the right side, a "Settings" dropdown menu is open, listing various settings options. The "User Permissions" option is highlighted with a red box.

## Third-party developer and apps

To authorise a new developer, or to manage your authorised third-party developers and apps, visit the Manage Your Apps page by clicking below

[Visit Manage Your Apps](#)

## Amazon MWS Developer Access Keys

To register as a developer, or to view your API Access keys, visit the Developer Credentials page by clicking below

2. Click **Authorize new developer** button.

The screenshot shows the Amazon Seller Central "Manage your apps" page. At the top, there's a navigation bar with the Amazon Seller Central logo, location (Koongo - Europe), website (www.amazon.co.uk), language (English), and a search bar. Below the navigation bar are various menu items: Catalogue, Inventory, Pricing, Orders, Advertising, Stores, Reports, Performance, and B2B. The main heading is "Manage your apps" with a sub-heading "Manage access to your seller data". Below this is a blue button labeled "Authorise new developer", which is highlighted with a red box. Below the button is a table with columns: Status, Name, Developer ID, Authorisation date (Expiry date), MWS Auth Token, and Actions. At the bottom, there's a footer with "Get support | Policies and Agreements | English" and "Koongo - Europe | © 1999-2018, Amazon.com, Inc. or its affiliates".

3. In the **Developer name** text box, enter **Koongo** as the name of the developer that you are authorizing.

4. In the **Developer ID** text box:

- Europe based subjects: Enter **9051-1235-5740** as the ID of the developer account.
- US & Canada based subjects: Enter **0176-5302-9598** as the ID of the developer account.
- Australia & Japan based subjects: Enter **2611-6230-2505** as the ID of the developer account.

## Amazon Marketplace Web Service (Amazon MWS)

Developer's Name:

Developer ID:  For example: 1234-1234-1234 or 123412341234

Next 

5. In step 2, click the **Authorize developer** button.

6. The **seller's ID and MWS Auth Token** appears.

# Amazon Marketplace Web Service (Amazon MWS)

Congratulations!

## Koongo can now access your Amazon seller account with MWS

These are your account identifiers, which Koongo will need to access your Amazon seller account. You can also view these identifiers and manage developer access to your seller account on the [Amazon MWS Developer Permissions](#) page.

Note: To help make sure your Amazon MWS authorisations are up to date, from time to time we may ask you to re-confirm the developers and applications you have authorised. You can learn more about our Developer Access Confirmation programme [here](#). You will receive an e-mail with a button to click to finish enabling the programme.
