

# Uninstallation

## Table of Contents

- 1 [Delete folders and files](#)
- 2 [Database modifications](#)

Here you may find instructions on how to uninstall the module. Following scenario is valid for **all** module versions we have released so far.

## Delete folders and files

- delete folder `app/code/community/Nostress/Nslexport/` or `app/code/local/Nostress/Nslexport/` (older module versions)
- delete file `app/design/adminhtml/default/default/layout/nslexport.xml`
- delete folder `app/design/adminhtml/default/default/template/nslexport/`
- delete folder `app/etc/modules/Nostress_Nslexport.xml`
- delete folders `app/locale/cs_CZ/Nostress_Nslexport.xml` and `app/locale/en_US/Nostress_Nslexport.xml`
- delete `xmlFeedExport.php` in Magento root (this file was not included in all module versions)

## Database modifications

- delete all tables `nostress_export_*`
- in table `core_resource` find and delete row with `code = nslexport_setup`
- in table `eav_attribute` delete all rows with `code = nsc_taxonomy_*`

Cache refresh

 Finally, do not forget to refresh cache 😊
