Common Filter

Export Out of Stock Products

Allows you to exports all or just in stock products.

Export variants as single products

If you use configurable products you may want to export its variants as single products. If set to Yes, the configurable/parent products are excluded from the feed.

Export removed products

By default **No**. Koongo can store also products which are not available in your e-store anymore (i.e. you have removed them from the catalog in the back-office of your e-store).

In some cases you may find useful to export them, e.g. this is the only way how to deactivate your past listing on Amazon. For more details please contact us at support@koongo.com.

Options: No - exports product listed in your store

Yes(All products) - exports all products, removed products are includes

Remove Only - exports only removed products

Attribute Filter

You can use any of store attribute for attribute filtering. It is also possible to set various attribute combinations.

Attribute filter conditions

For attribute filtering there are various condition options available:

- **is** - attribute equal to ... - e.g. "Color is Red" (only Color Red products are listed in the feed)
- **is not** - attribute not equal to ... - e.g. "Color is not Red" (Color Red products are excluded from the feed)
- **equals or greater than** - e.g. "Price final with tax equals or greater than 100" (only products with price equal or greater than 100 are listed in the feed)
- **equals or less than** - e.g. "Price final with tax equals or less than 100" (only products with price equal or less than 100 are listed in the feed)

- **greater than** - e.g. "Price final with tax greater than 100" (only products with price greater than 100 are listed in the feed)
- **less than** - e.g. "Price final with tax less than 100" (only products with price less than 100 are listed in the feed)
- **contains** - e.g. "Name contains Nike" (only products which includes "Nike" in Name attribute are exported in the feed)
- **does not contain** - e.g. "Name does not contain Nike" (only products which do not include "Nike" in Name attribute are exported in the feed)
- **is one of** - e.g. "SKU is one of 1111,2222,3333,4444" (only products which SKU equals to 1111 or 2222 or 3333 or 444 are exported in the feed)
- **is not one of** - e.g. "SKU is not one of 1111,2222,3333,4444" (only products which SKU does not equal to 1111 or 2222 or 3333 or 444 are exported in the feed)
